### Contagion Rat Feed Grain

The rat is doomed! Greatest success in Europe and America. The Process: Feed on bread the living culture, (as shown on the surface of a nutrient jelly, and which can be kept six weeks). Rat or mouse eating it immediately catches a Disease which is contagious, and is fatal in seven or fourteen days. This contagion is spread by the rat among the others—the whole tribe is exterminated! All evidence here shown to be convincing to both domestic and animals. To be used in all docks, warehouses, stores, farm buildings, private homes, and in any rat or mouse infested fields. Price: One box, postpaid, 50c; wholesale, one doz., $4.00 f. o. b. Augusta. Manufactured solely for us by America for our Bacteriological Bureau.
